

Scalability & Future Plan

Date	20 june 2026
Team ID	SWTID-2026-9290
Project Name	A COMPHRENSIVE MEASURE OF WELL BEING
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Limited real-time health data integration May reduce accuracy of well-being	May reduce accuracy of well-being analysis	high
2	Supports only basic assessment parameters	Some advanced health factors are not included	high
3	May reduce accuracy of well-being analysis	Performance may decrease with heavy traffic	medium

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports limited concurrent users	Deploy on cloud with load balancing
2	Data Storage	Supports limited concurrent users	Migrate to scalable cloud database
3	Performance	Suitable for small-scale use	Optimize queries and add caching
4	Security	Basic authentication	Implement multi-factor authentication and data encryption

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
-------	-------------------------------	-----------------	-----------------

Phase 2	Implement multi-factor authentication and data encryption	3m	Improves accuracy and user experience
Phase 3	Integration with wearable health devices 6 Months	6m	Enables real-time health monitoring
Phase 4	Mobile application with multilingual support	9m	Increases accessibility and user reach
