

## Technology Stack

|                      |                                      |
|----------------------|--------------------------------------|
| <b>Date</b>          | 20 JUNE 2026                         |
| <b>Team ID</b>       | SWTID -2026-9290                     |
| <b>Project Name</b>  | A COMPHRENSIVE MEASURE OF WELL BEING |
| <b>Maximum Marks</b> | 2 Marks                              |

### Define Your Technology Stack:

Identify the programming languages, frameworks, databases, front-end tools, back-end tools, and APIs that you will use to build your solution. A well-chosen technology stack ensures that your application is scalable, maintainable, and aligned with your project requirements.

Fill out the table below to detail the specific technologies chosen for each component of your

| S.No | Architecture Component / Layer                                               | Technology Chosen           | Justification / Purpose                                                               |
|------|------------------------------------------------------------------------------|-----------------------------|---------------------------------------------------------------------------------------|
| 1    | <b>Frontend / Client-Side</b><br><br><i>(e.g., React, Angular, HTML/CSS)</i> | <i>[Specify technology]</i> | <i>[Explain why this was chosen (e.g., responsive design, component reusability)]</i> |

architecture and provide a brief justification for your choice.

## Technology Stack Details

|   |                                                                                      |                             |                                                                                                   |
|---|--------------------------------------------------------------------------------------|-----------------------------|---------------------------------------------------------------------------------------------------|
| 2 | <b>Backend / Server-Side</b><br><br><i>(e.g., Node.js, Python/Django, Java)</i>      | <i>[Specify technology]</i> | <i>[Explain why this was chosen (e.g., fast processing, existing team expertise)]</i>             |
| 3 | <b>Database / Data Storage</b><br><br><i>(e.g., MySQL, MongoDB, PostgreSQL)</i>      | <i>[Specify technology]</i> | <i>[Explain why this was chosen (e.g., handles unstructured data, strong relational mapping)]</i> |
| 4 | <b>Cloud / Hosting / Deployment</b><br><br><i>(e.g., AWS, Azure, Heroku, Docker)</i> | <i>[Specify technology]</i> | <i>[Explain why this was chosen (e.g., easy scalability, cost-effective hosting)]</i>             |

|          |                                            |                             |                                                                                        |
|----------|--------------------------------------------|-----------------------------|----------------------------------------------------------------------------------------|
| <b>5</b> | <b>Version Control &amp; CI/CD</b>         | <i>[Specify technology]</i> | <i>[Explain why this was chosen (e.g., seamless collaboration, automated testing)]</i> |
|          | <i>(e.g., GitHub, GitLab, Jenkins)</i>     |                             |                                                                                        |
| <b>6</b> | <b>Third-Party APIs / Other Tools</b>      | <i>[Specify technology]</i> | <i>[Explain the specific feature this enables in your project]</i>                     |
|          | <i>(e.g., Stripe, Twilio, Google Maps)</i> |                             |                                                                                        |
